PREFACE

In the present bulletin an attempt has been made to list all of the theses which have been submitted in partial fulfillment of the requirements for advanced degrees in the Graduate School of the University of Kansas. The oldest thesis listed is for 1888. The degree of Master of Arts was, however, granted by the University as early as 1876, the first recipients being Flora Colman and L. D. L. Tosh. Thereafter, for more than a decade, it was customary to invite back to the campus at commencement time one or more former students to deliver "masters' orations" and receive, on the strength of this performance, the degree in question. Before the end of the nineteenth century the University discontinued the granting of degrees in such a manner, as well as the granting of all honorary degrees. The dissertations listed in the pages which follow were all written for "earned degrees." Of 3,581 titles which appear 3,345 represent work for the several masters' degrees, 236 for the doctorate.

In gathering information I have, whenever possible, gone directly to theses in the Watson Library. In addition I have made use of our accession books and card indexes, the files of the Graduate Office, of the Registrar's Office, and of the various departmental offices, annual catalogues, commencement programs, the alumni directories, and the early minutes of the faculties, especially those of the Graduate School.

When copies of theses were not available the assignment of them under subject-matter headings was made on the basis of titles only. For help in determining proper classifications I wish to thank the following faculty members: Wealthy Babcock, Kathleen Doering, Cora Downs, E. R. Hall, F. E. Jones, V. P. Hessler, Anna McCracken, Beulah Morrison, Paul Roofe, N. W. Storer, and Robert Taft. Miss Laura Neiswanger, of the Catalogue Department of the Library, has also been of great assistance to me.

I wish to acknowledge, finally, my gratitude to Professor Ethan Allen, Director of the Bureau of Governmental Research, to Dean John H. Nelson of the Graduate School, and to Mr. C. M. Baker, Director of Libraries, for the student help which he placed at my disposal.

B. E. W.

INTRODUCTORY NOTE

Miss Wilder's compilation has long been needed and should therefore prove to be very useful. With the thoroughness well known to associates on the campus, she has not only assembled the titles of all dissertations reposing in the University Library but has also verified the record of those which have been lost and of others which are found now only among materials held by departments. The result is a reference work so detailed and comprehensive that it can safely be trusted both as a factual guide and for its general implications.

We who are directly concerned with the activities of the Graduate School are grateful to her.

JOHN H. NELSON, *Dean of the Graduate School.*
